D-Orbit is "Best for the Environment" Honored for Creating Overall Positive Environmental Impact

(Milan, Italy) Today, D-Orbit has been recognized for creating the most positive overall environmental impact by the non-profit **B Lab** with the release of the fourth annual '**B Corp Best for the Environment**' list. The 'B Corp Best for the Environment' list honors businesses that earned an environmental score in the top 10% of more than 1,200 Certified B Corporations on the B Impact Assessment, a rigorous and comprehensive assessment of a company's impact on its workers, community, and the environment. Honorees were recognized among micro, small, and mid-sized businesses around the globe.

The B Corp 'Best for the Environment' list – part of the 'Best for the World' series – sets the gold standard for high impact companies and demonstrates any type of company can use business as a force for good. **"Today's honorees inspire all companies to compete not only to be best in the world, but best for the world.** We hope many will take the first step by using the B Impact Assessment to measure and manage their impact with as much rigor as their profit," said Jay Coen Gilbert, Co-Founder of B Lab, the non-profit organization that certifies B Corporations and monitors the companies' behaviors, which are able to satisfy high quantity and quality standards.

This is great result for D-Orbit, the young company which develops decommissioning devices to be installed on satellites prior to launch and able to dispose them at the end of their lifetime, avoiding debris-related risks, providing safe access to space and preserving orbits for future commercial and scientific missions.

"D-Orbit was born with the intention of offering reliable, cost-effective products, concrete solutions to our clients' compelling needs from the perspective of a sustainable spatial market. It's in the DNA of our company and of our people," said Luca Rossetini, D-Orbit CEO and Founder. From the beginning, D-Orbit's vision has recognized sustainability as a core element and a key rule for its own business. Sustainability is a must to be applied to all the company's activities in order to follow a new business paradigm: giving value to the power of D-Orbit's business not only to generate economic profits but also to solve social and environmental issues, which affect our societies, producing therefore positive impact on people and on the environment.

These are all elements, which have helped in reaching a new achievement: Best for the Environment 2015.
